

Color Palette

Primary Color

- The primary colors should dominate all print materials.
- Use this primary dark blue color for logos on a light background and body copy.

Dark Blue

CMYK 98, 96, 35, 29

RGB 38, 37, 88

HEX #262558

Note: Use RGB and HEX formulas for on-screen and digital use. CMYK values are for print applications. All color applications should adhere to ADA contrast guidelines

Color Palette

Accent Colors

- The accent colors should be used along with the primary palette and supporting palette but should not overwhelm either one.
- Use these colors for logos headers and sub-heads (see typography examples).
- The orange should be used sparingly, for smaller design elements that you would like to stand out (like an icon, important word/phrase, or the separator at the bottom of this page).
- Only use the teal and green accent colors by themselves, and with the orange or light grays/white neutral color for legibility (never on top of one another for text).
- The light yellow can be used as font colors placing on top of primary color but not on any accent colors. It can be used as color block with any other brand colors.

Note: Use RGB and HEX formulas for on-screen and digital use. CMYK values are for print applications. All color applications should adhere to ADA contrast guidelines

How to install Google Fonts

First, click Download Fonts Here in the following 2 pages to navigate to the Google Fonts page. You can download individual styles by clicking “Select This Style” or you can download the entire family by clicking the “Download Family” button at the top of the page, on the right.

Second, install the fonts on to your computer. To do this, double-click the downloaded .zip archive to open it. Then, double-click on each font file (usually a .ttf extension) to open it. Once you’ve double-clicked, your computer will open a preview of the selected font. Then, click “Install” or “Install Font” and you’re all set! The selected font will now be installed on your computer. Please Note: If there are multiple fonts in the folder, you will need to repeat the process for each font.

When Google Fonts are not available

Please use universal fonts that are more widely accessible like Georgia Regular/Bold in place of Roboto Slab and Arial Regular/Italic/Bold in place of Poppins, which are outlined in the following pages.

Typography

Roboto Slab

Roboto Slab Light

Roboto Slab Medium

Roboto Slab ExtraBold

[Download Font Here](#)

When to use Roboto Slab*

Use Roboto Slab ExtraBold for all headlines in an accent color.

Use Roboto Slab Light for any information under the logo or near the company name, like a tagline, website address or other information.

Use Roboto Slab Medium for sub-heads in the primary color or an accent color.

*When a universal or more widely accessible font is needed, please use Georgia Regular for sub-heads and Georgia Bold for headlines in place of Roboto Slab.

Poppins

Poppins

Poppins Italic

Poppins SemiBold

Poppins ExtraBold

When to use Poppins*

Use Poppins for all body copy in black or all branding colors except light grey(#f4f4f6) and yellow(#f9de8d). Poppins SemiBold can be used for section headers within body copy, these should be in an accent color.

Use Poppins Italic for quotes in the primary color, or captions in an accent or neutral color, depending on importance (accent colors are for when things need to stand out).

Use Poppins ExtraBold for any Buttons or CTAs in the primary color or white, depending on the background.

*When a universal or more widely accessible font is needed, please use Arial Regular for body copy and Arial Italic for quotes or captions in place of Poppins.

Typography

Examples

Headline

Sub-Head

Body Copy, lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut faucibus pulvinar elementum integer enim neque. Facilisis magna etiam tempor orci eu.

Section Head

Body Copy, Accumsan sit amet nulla facilisi. Purus semper eget dui at tellus at. Pulvinar etiam non quam lacus suspendisse faucibus. Sit amet purus gravida quis. Commodo sed egestas egestas fringilla phasellus faucibus scelerisque eleifend. Ultrices neque ornare aenean euismod elementum.

Headlines and Sub-Heads should be capitalized when they are one or two words. Use sentence case for anything that is longer than that, so it reads like a phrase.

The only exception is the tagline, all words should be capitalized except "for."
